22 February 2012

**For the attention of John Macholc**

Dear Sir,

**PROPOSED LOCAL DEVELOPMENT ORDER RELATING TO ADVANCED  
ENGINEERING MANUFACTURING USES AT LAND WITHIN PARCEL A,  
SAMLESBURY AERODROME, SAMLESBURY**

Thank you for your email and letter of 25 January 2012 regarding the above.

I am aware that a number of planning applications have been received for developments at the aerodrome over the past few years. Indeed, in response to these applications improvement works at junction 30 of the M6 motorway have already been carried out and I am aware that further works are also conditioned as those permissions are built out in the future.

It is not immediately apparent how the proposed LDO for the Samlesbury site affects those consents or the works completed and conditioned. It may therefore be worthwhile including a summary of those issues for consideration as the master plan, referred to in Section 17.8, is drawn up.

I also note and welcome the fact that transport impacts will be considered further as part of the master planning process and within each proposal as it comes forward. I should though stress that consideration of the impact on the trunk road network, as well as the local road network, should be considered where appropriate.

Yours faithfully
