Ref: site 10 Employment land at Higher College Farm Mark Hurst EAL3 Reg19

Dear Officers, I was appalled to see that the above site is being put forward as Employment land.

The site is situated on a very busy road with several bad bends with national speed limit, which have already claimed lives. Access from here to the motorway or road networks means large vehicles would need to travel through residential areas, past schools and add to traffic bottle necks in Ribchester, Grimsargh and Chapel Hill.

Surely Employment sites that already exist would be a far more suitable consideration. In addition the site is on one of the main access routes to our AONB tourists and visitors would certainly be discouraged by having to negotiate industrial sites and heavy goods vehicles. Think what an impression it would leave on our potential visitors, taking their visits, money and going elsewhere.

Please think these issues through before needlessly spoiling our environment.
