Dear sir/madman

I must be one of the 21% who is not satisfied with the ridiculous amount of building going on in the Rubble Valley, the constant noise, waggons thundering past our house, mud all over the road and footpath, dust and pollution causing us to use the tumble drier as we cannot hang washing out, traffic lights everywhere adding time to every journey, difficulty crossing the road, being woken up early every morning with the ceaseless noise, the taking of the only amenity in the village (the allotments) to build yet more houses, all the green areas that i used to be able to walk in have long gone. We cannot sell our house because of all this, and we cant get out of the nightmare that used to be a quiet village. I dont know where you find the 79% from?

Maybe places like Waddington or Wiswell where all the councilors live where there is no building.
