Subject: Proposed modifications to HED -DPD

MM 188

The modified plan is a pointless waste of time and money and a complete deception. It purports to list additional sites to those shown in the HED-DPD but does not list all the sites which are considered suitable for development. As just one example: planning application 3/2018/0008 was recently recommended for approval despite a series of plans excluding this land from development (Core Strategy, HED-DPD & the latest modifications to the HED-DPD.) It would appear to the layman that any field in the Clitheroe area will have planning permission granted if requested, irrespective of its inclusion or exclusion from the so called plans. If the plan to be put to the Inspector would say just that it would take less time to read and at least have the virtue of being honest, however unpalatable to Clitheroe residents the admission would be.
