Dear Sir

MM106

I am writing to agree and support modifications for additional houses being proposed for Build in certain areas of Clitheroe

e.g. highmoor it is an ideal situation for easy access on to the A59 without congesting Clitheroe especially when the new round-a-bout is in place also they have access to chemists - schools - D.C. Surgeons either to walk or on the bus route - Traffic would be going out on the A59. If these are built there - you would have the number of houses required and then all these smaller sites can be left alone.

We are very much against building more houses in our surrounding villages.

e.g. Chaburn there are no more school places

lost library

lost bus services (not all)

no chemist - no D.C. Surgery.

also Chaburn has got its allocation for house builds and traffic wise could not withstand any more cars in the village the centre of the village is already congested without any more.

and all our villages should be kept environmental friendly and the countryside kept for future generation - we are not living down in London surrounded by builds we live in the Ribbles Valley for its beauty.

Don't Spout it
