[REDACTED] wish to object to the modification of the housing policy in the Ribble valley to include potential new build housing at the above address. The objection is based on the fact that this is green belt which should only be built on in special circumstances. There is nothing to suggest there are any. Further the site is we believe unsustainable as there are limited school places and limited public transport. Access on foot to any amenities is on unlit roads without pavement. The local shops and main bus services are more than half a mile away. Access to the site is unsuitable and potentially dangerous. Further more the road is not capable of dealing with further traffic particularly at the busy times. The development will not be in character with the area. On a different note the development on the adjoining site has proved to be a disaster with houses still unsold which would question the demand in the area with the various problems mentioned above for anything similar. Yours [REDACTED] iPad
