To whom it may concern

I am writing in reference to the above document and am dismayed that we are looking at further development in the Ribble Valley. I feel as a borough we have more than done enough and well and truly surpassed our allocation in the core strategy.

As a Chatburn resident and a parent of Children at the Village school I have severe concerns about any further developments in Chatburn. The school is absolutelty full to bursting and the Village infrastructure in general cannot physically take any more pressure, you only need to drive through the Village to realise this. The village now has a decimated bus service, closed library plus many more local amenities have been lost causing a general lack of services.

Although I am not in favour of building any more houses in the borough, I believe if this has to be done you have to concentrate on the principle settlements that have been identified in the plan where further infrastructure can be developed.

Thanks
